*2/17/37-
Mr. D. S. Z. (Asst. Secy. to Govt.)*

With reference to the Development Secretary's Letter No L 5133 M 168-35-2 dated 10/11th January 1936 asking me to forward the estimate for Rs 21 500/- made by the Bureau of Sanitary Engineering for the above scheme and a statement of assets and liabilities of the municipality together with information as to how the municipality would liquidate the loan if sanctioned and how they would meet the recurring maintenance charges I have the honour to forward herewith the records ending with report No Hmc 31/37 dated 20th August 1937 received from the President Honnali Municipality which contains the estimate for Rs 21 500/- in question As regards the assets and liabilities of the municipality it is reported by the Amildar that the assets of the municipality amounted to Rs 11 553/- on 1st July 1937 as noted in the margin and that there

Amount at the credit of the municipality in treasury on 1st July 1937	Rs 629/-
Investment in State Loan Bond	1000/-
Investment in Government S B Deposit	6398/-
Arrears of municipal taxes to be collected	3526/-
	<u>11,553/-</u>

were no liabilities on that date A copy of the statement has already been sent with my letter No

M3 438 C 1945/34 dated 22nd July 37, while recommending that the Municipal Council may continue under ~~supersession~~ supersession for another year

As regards the ways and means for meeting the annual maintenance ~~charges~~ and for the repayment of the loan instalments

I am

I am to state that the annual maintenance charges are estimated at Rs 1500/- it is proposed to meet this and the loan instalments by curtailing expenditure and improving the municipal income as shown below

1) Income expected by the levy of market fees in the shandy the levy has been introduced with effect from 1st September 37	Rs600/-
2) Income expected by levying general water cess on buildings and lands at 4 annas in the rupee of assessment	388/-
3) Income from House connections about 48 persons have consented to take pipe connection	800/-
	1788/-
4) Retrenchment of establishment one Scavenger on Rs 15/- Rs 180/- one lighter on Rs 10/- 120/- }	300/
At present the posts of two of the Sweepers on Rs 10/- each are kept vacant They will be continued to be kept vacant till the finances of the municipality improve	
Total	2088/-

Besides there is scope for improving the resources of the municipality still further by extending the limits of the municipality by the revision of assessment &c

It may be kindly seen from the above that the municipality will not only be able to meet the annual maintenance charges but could also make provision in its annual Budgets for the repayment of the loan instalments

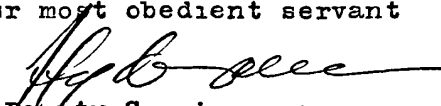

Honnali town was infected with Cholera twice during the year 1936-37 The epidemic caused great panic and a large number of persons including two Revenue Inspectors and a Taluk Office Clerk fell victims to the dire disease the source of infection

on

on both the occasions was the Tungabhadra river which is the main drinking water supply for the town and the water of which having contained the washings from the first rains

In the circumstances I request that sanction of Government may be kindly obtained early to the proposal as already recommended

I have the honour to be
Sir
Your most obedient servant

Deputy Commissioner

8 FEB 1938

To

P H Krishra Rao, Esq , M A ,
Secretary to Government,
Local Self Government Department,
B a n g a l o r e

Suo

Sir,

With reference to your letter No L 3879/M1
168-35-6 dated the 29th October 1937, regarding the levy of
general water rate, in the Honnali Municipality, on build-
ings and lands etc , I have the honour to state that the
President took necessary action to levy a general water
cess at 4 annas in the rupee of assesment on buildings
and lands and called for objections, if any, from the
towns people, as required by para 2 of Chapter II of the
Taxation Rules issued by Government in this behalf, in
accordance with the Minor Municipalities Act 1933 The
above notice was also served in the town by beat of
tom tom on 10-11-37 In response to this notice, only
four applications signed by a number of persons were
received by the President in time

2) The petitions not only object to the levy of the
genral water cess at 4 annas as suggested on the ground
that the incidence of taxation in the Municipality, which
is already heavy, would be ~~heavy~~ ^{become heavier}, but also to the taking up
the scheme of supply of protected water to the town in
preference to the more urgent improvement works such as
Drainage and road improvement works They seem to be content
with carrying water from the river itself The President
has reported, that a few people who were against the intro-
duction

introduction of this scheme from the beginning are probably responsible for this opposition and that therefore the objections do not merit any consideration. A copy of the report received from the President in the matter and also the four objection petitions are enclosed to the file sent herewith for reference.

3) In the circumstances, I am of opinion that the objections are not tenable and worthy of notice. In the interest of the health of the town, it is very necessary to provide a protected water supply. The levy of general water cess, therefore, cannot be put off. I recommend therefore, that the levy of a general water cess of four annas in the rupee of assessment on buildings and lands, as reported by the Amildar President, may kindly be sanctioned by Government and that the levy may however, come into force from the year of the introduction of the water supply Scheme.

4) The entire records may kindly be returned when no longer required.

I have the honour to be,
Sir,
Your most obedient servant,

enc

M. Dehadra
Deputy Commissioner,
Shimoga District

Letter No. H M C 31/37-38 dated 30th December 1937 from the
Amildar, Honnali Municipality, Honnali to the Deputy Commissioner,
Shimoga District

=====

In obedience to your memo No M3 149 C 1204/34 dated 4-11-37 forwarding a copy of the letter No L 3879/M1 168-35-6 dated 29-10-1937 received from the Secretary, Local Self Government Department in the matter of taking preliminary steps for levying water cess at the rate of four anna in the rupee of assessment on buildings and ~~xxxx~~ vacant sites in Honnali town, I beg to report that as a result of a notification issued in this behalf on 10-11-37 four objection petitions were received in which there is not only objection against the levy of the water cess but also an opposition against the introduction of the water supply scheme itself. The main contentions in support of their opposition are the following

1 There is no adequate drainage in the town to avoid water logging which will result in rendering the town unhealthy,

2 The town people being mainly agriculturists, their grain pits situated near their houses would be affected and the storage of grains spoilt,-

3 There is no water scarcity in the town due to the nearness of the river Thunga-bhadra with its perennial supply and the existence of a number of wells in the town, and as such there is no necessity for a separate water supply scheme,

4 The present incidence of taxation is already heavy and a further increase by way of water cess would prove more burdensome, limited as their resources are, and

5 There are other various and urgent items of town improvement for which funds are needed but for which the funds would be rendered inadequate if the water supply, with its heavy outlay and recurring charges is undertaken

Considering these objections on their merits, it is true that there is no adequate drainage in the town. But it is possible to overcome this drawback ~~and~~ a good drainage gradually provided for

With the improvement in drainage any possible harm to grain pits and risk to health of the town, can be avoided. It is also true that the river Ihungabhadra provides a perennial source of water supply. But abundant as it is, it is not protected. A lack of this provision unfortunately endangered the town last year to two outbreaks of cholera which took a heavy toll. The town really lacks certain improvements like road repairs, filling up of the fort trench, etc. But action has been and is being taken in this behalf. Improvements will be effected gradually as funds permit. But the main core of their objection is against the levy of water cess and the resulting increase in taxation. Even in this, their objection does not stand scrutiny in the light of facts. As per last year's figure, the incidence of taxation per head of population in this town was only Re 1-1-5. The levy of water cess, it is apparent, will not add much to this and the resultant figure will not yet all be heavy considering the advantage the people would derive from an improved and protected water supply at their very doors. The increase will be about two annas per head of population (which is 4000). In view of these, the objections put forward, do not merit any consideration. In fact the opposition was not pronounced till now and it is strongly suspected that a few interested people who were against the introduction of the scheme from the beginning, are probably responsible for this opposition.

This municipality has already expressed itself in favour of the introduction of the scheme and the means have already been worked out and a recommendation submitted to Government in this behalf, a recommendation which was made mainly in the interest of the health of this town.

Under these circumstances, I beg to submit that kind recommendation may be made to Government for the sanction of the levy of water cess at four annas in the rupee of assessment on buildings and vacant site within the municipal limits with effect

5294

Office of the Deputy Commissioner,

Local Self Government Department,
Bangalore

Subject - Water Supply Scheme - Honnali Town

Sir,

With reference to your letter No L 6777/M1-168-35-
dated 7-2-1938 on the above subject calling for certain addi-

tional particulars re, the financial condition of the Honnali Municipality, I have the honour to forward herewith, in original, the report received from the president in the matter. A statement showing the receipts and expenditure under the several heads as per sanctioned Budget for the current year is also enclosed for perusal. It could be seen therefrom that a sum of Rs 8000/- was expected to be realised under different heads of direct taxation. The president has reported that the actuals will fall short of the expected realisations by about Rs 1600/- The main difference is under "Taxes on buildings and lands". The revision of Assessment could not be taken up in the early part of the current year but it has been just now completed and will be given effect to from 1st July 1938. As a result of this Revision, the demand has been finally fixed at Rs 2346/- per year as against Rs, 1636-4-0 before Revision resulting in a net increase of Rs 709-12-0 per year. A printed copy of the Budget Estimates of the Municipalities in the District in which a copy of this

office

Office Review on the Budget Estimates of Honnali Municipality has been printed on pages 13-15 is also enclosed for reference

As regards the query whether steps have been taken , to levy the Market Fees and if so what the average realisations under this head would be, I have the honour to state that the Market fees are being collected since 1st September 1937 and the realisations under this head during the current year is Rs 740/-, for these nine months. On the average the annual income under this head may be taken at Rs 800/-

It will thus be seen that as a result of revision and by levying Market Fees the average income of the Municipality will be raised by Rs 1500/- roughly as detailed in the margin, from next

-----	{	year - Proposals have also
Buildings and lands Rs 709-12-0	{	been submitted to sanction
Market Fees 800- 0-0	{	
-----	{	
Rs 1509-12-0	{	the levy of a general water
-----		rate at 0-4-0 in the rupee

of assessment on buildings and lands and this will bring in an additional income of Rs 586-8-0 per year. The Municipal Council have to their credit an investment of a sum of Rs 7398/- (Rs ¹⁰⁰⁰ 10 000/- in State Loan Bonds and the rest in Government S B Deposit) as already reported. I am therefore of opinion that the Municipality will be able to meet the annual maintenance charges of the Water Supply Scheme and can also repay the loan in instalments as already ^{Suggested} reported in this office letter of even number dated 24.12-1935

I request you to kindly obtain the sanction of Government to the Water Supply Scheme for this Town at an early date

I have the honour to be
Sir,
your most obedient seryant,

M. J. Jadhav
Deputy Commissioner,
Shimoga District

SIR

With reference to your letter No L 3807/M1 165-35-9 dated 10-11-1938 on the above subject forwarding revised plans and estimates for the said work together with Sanitary Engineer's reports in original, I have the honour to forward herewith the report of the President of the Municipality together with the copy of the resolution of the Municipal Council dated 5-12-1938 in this behalf. As the scheme is very costly being Rs 14,880/- in excess over the old estimate the Municipal Council cannot afford to meet the cost. I think that this work may be deferred for the present.

I have the honour to be,

Sir,
Your most obedient servant,

C. A. Narayana Rao
